Arup Group Limited

Project portfolio management (P3M) consulting in implementing a new ERP at Abu Dhabi Airport

Dada Enterprises lead the solution development and business consultancy to transform Arup's ADIA project into a project-oriented project. Dada designed the entire P3M system using workshops and interviews to jointly analyse the competencies to be established, organizational structures and required processes to effective tool support. We managed a global roll-out of a standardised Project Controls/reporting approach which allowed an automatic transfer of data between the between multiple ERP systems. This helped Arup to control their risks, fee management and contractors' costs.

Dada Enterprises provided P3M3 consulting to Arup in moving to a more project-oriented company, with supporting organisational structures and tool sets.

About Arup

Overview:

Arup is a British multinational professional services firm headquartered in London, which provides engineering, design and business consultation. Arup was founded in London in 1946, and is best known for its design work on the Sydney Opera House. It has 83 offices in 31 countries worldwide. In 2015, revenues were £1,125.5 million and 12,143 employees.

The Dada Enterprises Advantage

The key success factors for Arup:

- ADIA needed schedule activities, actual hours expended, internal break even rates to be more easily reported to raise invoices and track their commercial position.

Solutions:

Dada Enterprises' cost management system improved Arup's invoicing process and monthly portfolio reporting.
