

Join our Engagement Forum

Traditional risk approaches are too narrowly focused on stochastic events and need to be more inclusive of non-event risks.

Especially when Projects are dominated by high velocity, high volume, complex information streams.

In a world of ever-increasing Complexity, Uncertainty & Dynamism, securing a "Natural Resilience to Disruption" has become the new requisite for Organisational Risk Management.

To facilitate this, the IRM will be creating a 'Risk & Complexity – Good Practice Guidance' publication coming out in Spring '24.

But we need you to share your stories...
